Technology – UV purification + HEPA filtration

The below information is intended to give just a brief overview of the types of products available. We are happy to provide more information about each product's functionality and associated ongoing maintenance. We would recommend speaking to a Stearn representative to make sure the unit you buy will be a suitable fit for the environment it will be used in. Discounts are available for purchases of 5+ units.

Please direct enquiries to mary.burrows@stearn.co.uk

1 : SteraSpace by Airdri

A range of wall mountable Air and Surface Sanitisers, suitable for small to large teaching rooms, office spaces, washrooms and elevators
Technology: UV lamp

SteraSpace air and surface sanitisers control infections by killing bacteria, viruses, mould and fungi. The units provide 24/7 protection in rooms, 365 days a year and are proven to kill 98.11% of airborne and 99.6% of surface micro-organisms. Steraspace utilises the most advanced virus and bacteria control technology of its kind and offer peace of mind to those of us returning to busy offices, teaching rooms and workspaces. The range is suitable for different room types up to 80m², plus the all-new ELEVATOR model.

2 : Blueair Classic Range, Blueair Healthprotect

A range of freestanding Air Purifiers, suitable for busy domestic and commercial environments

Technology: HEPA filtration

Blueair Classic

Trusted by allergy sufferers, the Blueair Classic range is a timeless option that gets the job done, quietly and effectively. An air purifier designed and manufactured to provide years of service and backed by its 2-year warranty to guarantee clean air for years to come. Removes airborne viruses and bacteria and removes airborne allergy and asthma triggers like pollen, dust, pet dander, and more. Blueair Classic 205, 405 and 605 models are Wi-Fi enabled. Adjustments to the air purifiers can be made manually anywhere and at any time, either via the touch buttons on the control panel located under the flip-up lid. Remotely control fan speed and set schedules from your smartphone, tablet or Alexa enabled device.

Blueair HealthProtect™

The HealthProtect™ range has an abundance of clever technology. Both the 40i-model and the 70i-model are Wi-Fi enabled, have a GermShield™ function to prevent bacterial growth, pre-filters and a main filter to purify air. Each model has control functions and built in sensors. The 40i-models have a display for particulate matter data. The 70i-models have a dynamic screen control, with additional functions for particles, gases (tVOC), temperature, relative humidity and filter lifetime. You can change the air purifier settings at any time, using the control panel on the air purifier or remotely using the Blueair app.

	Model	Area Size	Dimensions (mm)	Installation	Application	Price	
CLASSIC	205-PA	26m ²	533H x 432W x 209D	Freestanding	Offices / any	£295.00

3 : Air X PRO

*A colour digital display shows current air quality across the Air X Pro products.
All units can be wall mounted or freestanding.
Technology: UV purification + HEPA filtration*

With an 8 step air purification system, Air X Pro purifiers feature patented technology and remove up to 99.9% of all particles, viruses, bacteria and other airborne allergens. All units in the range can be controlled via Wi-Fi or the provided remote control. They are super slim in design so as not to take up too much space in your workplace and have an LCD screen for monitoring live air quality. Suitable for rooms from 25 to 240m².
