

Procurement services

Make a *real* impact

That's what our procurement frameworks can do for you. They're designed to bring genuine, cashable cost efficiencies to your public sector work programmes without sacrificing the level of choice and compliance we know you count on.

In a complex and increasingly challenging environment, our role is straightforward - to help you buy smarter and with confidence. We give you access to a wide range of construction, property and built environment procurement frameworks. Every supplier and contractor on our books is held to the highest cost and quality standards, while all our framework agreements are OJEU compliant.

In this brochure, you'll find out a bit more about who we are and the benefits we deliver for our members. Turn to page 6 for full details of our procurement frameworks.

Delivering more than

£147m

savings through the procurement process

Cost savings and community outcomes

Our frameworks typically save members as much as 30% on market prices, before indirect savings from the procurement process are taken into account. But the social value generated through our frameworks is just as important - our community regeneration offer supports members to achieve tangible community outcomes on their projects and investments.

Procurement is much more than a financial process. Good businesses recognise it as a source of sustainable bottom-line savings. Outstanding public sector organisations use it to drive community regeneration and other positive social outcomes.

Working in partnership with members, our focus and advisory groups are designed to bring people from across the procurement spectrum together. We offer tailored programmes to support sustainable growth and development for businesses and communities, as well as tackling unemployment and reducing reoffending.

We don't operate for the commercial gain of stakeholders, there's no joining fee or annual charge for Fusion21 members.

Why use a Fusion21 framework?

When you select a Fusion21 framework, you're cutting out the high cost of running your own procurement exercise. You're also gaining access to procurement knowledge from a team of technical experts, as well as a supply chain that is rigorously assessed and continuously monitored.

All frameworks are OJEU compliant and are renewed every 4 years on average

Each one of our frameworks is carefully designed to enable smarter buying and make contract management easier for our members. If you need support with any aspect of the procurement process, just get in touch - we're here to help.

Here are the benefits of our frameworks at a glance:

- Save money, time and resources
- Ensure legal compliance with Public Contract Regulations 2015 and EU Directives
- Access a supply base that is tested on capability, experience and cost models
- Monitor performance, quality and service delivery during the contract
- Share risk - you have added protection with a framework
- Measure progress towards desired outcomes with KPIs
- Access economies of scale through increased buying power
- Comply with the Public Services (Social Value) Act 2012

Our working process

Whether you're working in construction, property or the built environment, we aim to make the procurement process as straightforward as possible for our members. This is what you can expect when you choose a Fusion21 framework:

Pre-project

- No joining fees
- Advice and support throughout the contract
- Direct call-off or mini-competitions
- Guidance at pre-contract and review meetings
- Drafting performance specifications
- Drafting contracts
- Engagement with local supply chains

During the project

- Mobilisation support to ensure the start on site day is achieved
- Cost benchmarking
- Cost management
- E-procurement solutions
- Category management
- KPI reporting
- Adjudication in the instance of poor performance

Post-project

- Post contract reviews
- Post completion final account support
- Cost benchmarking
- Social value and job creation reporting

Procurement regulations

Frameworks are most often used to procure individual contracts above the threshold values. However, UK policy and the EU Treaty now requires that for all contracts - including those below the EU thresholds - the tender process must adhere to the principles of openness, fairness and non-discrimination. Pre-tendered frameworks are used to ensure these principles are upheld.
